

HANDHELD TORCH IGNITOR

4700 South Garnett Road | Tulsa, OK 74146 USA | +1 (918) 258 8551 | zeeco.com

When operators need an alternate ignition source to light a burner or pilot, they can use a ZEECO® handheld torch ignitor (HHT) to ensure safe and reliable light off. Designed for ease of use and durability, the HHT is available in various configurations for your specific needs.

FEATURES:

- » Constructed with 316 stainless steel firing tube
- » Lightweight and portable
- » Fires with propane, MAPP, or refinery fuel gas
- » Available in custom lengths and firing angles from 24"-72"
- » Instant on/off trigger
- » Self-sparking ignition
- » Flame adjustment knob to optimize flame
- » Built-in pressure regulator
- » Built-in venturi to produce a tighter, more consistent flame
- » Optimized tip for high heat output and a stable flame
- » Female CGA600 Connection
- » Supercharger valve extends flame range and intensity on demand
- » Maintains ignition in high draft environments

HHT-QUICK DISCONNECT (QD)

The HHT-QD utilizes a quick-connect so that operators can connect to a local facility gas source. A ball and gate valve allows for precise control of fuel flow on a wide range of inlet fuel pressures.

WARNING:

Explosion Hazard: Check area for flammable gases prior to use.
Disconnect and store gas bottles when not in use.
